### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-5,7,8,10-15,17,18,19-27 rejected under 35 U.S.C. 102(b) as being anticipated by Farag et al (US 5206572)

Claims 1,11,21: a motor controller system, comprising: a motor controller including solid state switches (105-108) for controlling application of power to a motor (101), and a control circuit for controlling operation of the solid state switches, the control circuit comprising a programmed processor (123) for commanding operation of the solid state switches, and a memory (col. 5: 15-36) connected to the programmed processor storing parameters relating to operation of the solid state switches, and an interface circuit (115) operatively connected to the programmed processor; an external configuration device (125) including a memory for storing parameters relating to operation of the solid state switches and an interface for communication with the motor controller (col. 4: 50-58); and means (127) operatively associated with the programmed processor and the external configuration device for transferring a configuration database file between the controller memory and the external device memory, the configuration database file comprising a plurality of the stored parameters relating to operation of the solid state switches (col. 10:38-11:25).

Claims 2,12, 22: wherein the parameters stored in the external device memory define the configuration database file to be transferred to the controller memory (col. 10:38-11:25)...

Application/Control Number: 10/786,320 Page 3

Art Unit: 2837

Claims 3, 13,23: the transferring means comprises means (127) for downloading the configuration database file from the external device memory to the controller memory (col. 10:38-11:25).

Claims 4, 14, 24: the transferring means comprises means (127) for uploading the configuration database file from the controller memory to the external device memory (col. 10:38-11:25).

Claims 5,15, 25: the transferring means further comprises means (127) for subsequently downloading the uploaded configuration database file from the external device memory to the controller memory (col. 10:38-11:25).

Claims 7, 17,26: the external device memory stores a plurality of pre-configured database files (col. 11:8-25).

Claims 8 18,27: the transferring means comprises downloading a select one of the preconfigured database files from the external device memory to the controller memory (col. 11:8-25).

Claims 10, 20:a wired communication path (127) between the programmed processor and the external device.

## Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 6, 16 rejected under 35 U.S.C. 103(a) as being unpatentable over Farag et al. in view of Perholtz et al. (US 5732212)

Claims 6, 16: Farag et al teach the limitations of claims 4, 14. Referring to claims 6, 16, they do not teach a printer operatively associated with the external device for printing a listing of the uploaded configuration database file. Perholtz et al teach a printer operatively associated with an external device for printing a listing of the uploaded configuration database file (col. 48:28-46). It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the apparatus taught by Farag et al to have a printer as taught by Perholtz et al in order to allow a user to manage the system.

5. Claims 9, 19 rejected under 35 U.S.C. 103(a) as being unpatentable over Farag et al in view of Kawai (US 6144183)

Claims 9, 19: Farag et al. teach the limitations of claims 1, 11. Referring to claims 9, 19, they do not teach an infrared communication path between the programmed processor and the external device. Kawai teaches an infrared communication path (fig. 1). IT would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the apparatus taught by Farag et al to have an infrared communications path as taught by Kawai in order to allow wireless communication with little interference.

### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to RENATA MCCLOUD whose telephone number is (571)272-2069. The examiner can normally be reached on Mon.- Fri. from 5:30 am - 2pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Walter Benson can be reached on (571) 272-2800 ext. 37. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
